# Mastering Math Facts

## Addition and Subtraction

### Mini Pack Contents

Addition Table Activities .....	Page 4
Addition and Subtraction Games.....	Page 11
Drill and Practice Worksheets .....	Page 19
Math Fact Reward Certificate.....	Page 23
Addition and Subtraction Flashcards .....	Page 24

### How to Use This Mini Pack

Mastering Math Facts is a proven system for developing mathematical fluency with basic math facts. The original book focused on multiplication and division, and I had intended to write another book with strategies for teaching addition and subtraction. However, that project is many years down the road. In the meantime, I'm offering this Mini Pack of addition and subtraction materials to supplement the original version of Mastering Math Facts available from Teaching Resources ([www.lauracandler.com](http://www.lauracandler.com)). As it turned out, many of the strategies in that book were easy to adapt for addition and subtraction.

It might be possible to use these activities without reading Mastering Math Facts first, but they will make more sense when you have read about the entire program. It's highly recommended that you purchase that Power Pack and read about the Daily Drills, motivational Ice Cream Scoops program, and other strategies. Those ideas can easily be adapted for use with addition and subtraction and are not repeated in this add-on book.

So what's in this book? You'll find blackline masters of addition table activities, drill worksheets, addition and subtraction games, and flashcards. What you won't find is directions for these materials. To learn how to use them, refer to the related activities in Mastering Math Facts.

Let the fun begin! Before you know it, your students will be mastering their addition and subtraction facts in style!

# Math Fact Showdown

Number of Players: 2 to 4

Materials: Deck of Flashcards

Individual dry erase boards and markers

Calculator or math fact chart for checking answers

Directions:

1. Before starting, shuffle the flashcards and place them face down in the middle of the playing area. (If the flashcards have the answers on the back, place them in an envelope.)
2. Decide who will be the first Leader.
3. The Leader turns over the top card and reads the math fact aloud.
4. Everyone on the team, including the Leader, writes the answer. No talking!
5. When finished, everyone places their dry erase board face down in front of them.
6. When everyone is ready, the Leader says, "Showdown!"
7. Everyone flips their boards over and shares their answers.
8. Celebrate correct answers and help anyone whose answer was not correct. (You may have to use a calculator or consult a math fact chart to make sure you are correct.)
9. The role of Leader rotates to the left and the game continues with the new Leader turning over the top flashcard.
10. When you are finished, be sure to return the cards to the proper storage location!

# Addition War

Number of Players: 2

Materials: Deck of 30 to 40 Number Cards or  
Playing Cards (remove Aces and face cards)

Directions:

1. Shuffle the deck of cards and divide them evenly between you. Do not look at your cards!
2. Face your partner. At the exact same time, each of you will take the top card from your deck and place it face up between you.
3. Immediately add the two numbers and call out the answer. Whoever says the sum first wins both cards and places them at the bottom of his/her deck.
4. If you say the sum at the exact same time, you declare WAR! Together, chant the words "I Declare War" and place three cards on the table. Put the first 2 face down and the third one face up. Quickly add the two cards that are face up, and say the sum. Whoever says the sum first wins all cards on the table!
5. Repeat steps 1 - 4 until one person wins all the cards in the deck or the time is up. The person with the most cards is the winner.

# Boning Up on Math Facts

## Addition Rules

**Materials:** Bone Up on Math Facts Gameboard  
Dog Bones (20 - 30 paper clips, dried beans, etc.)  
Deck of Playing Cards or Number Cards

**Object of the Game:** To win the most dog bones by recalling addition facts quickly and accurately.

### Directions:

1. Game Set Up: Players face each other with the gameboard between them. Begin by removing the aces and face cards from the deck and shuffling the remaining cards. Place the deck face down on the Dog House. Pile the dog bones (paper clips, dried beans, or other small items) on the oval dog bone pile.
2. Each player draws 5 cards from the Dog House. Players may look at their own cards but should not show them to their opponent.
3. To begin play, both players choose 2 of their own cards to place **face down** in their own Dog Pen. After both players have placed their cards, they turn them **face up** and add the numbers on their own two cards. Each player announces his or her sum aloud. The player with the greatest sum wins and takes a bone from the pile. (However, if a player does not state his or her sum correctly, the other player automatically wins the round.)
4. Players remove both of their cards from the gameboard and set them aside to create a discard pile. Each player draws 2 new cards from the Dog House so that they both have 5 cards.
5. Repeat steps 3 and 4 until time is up.
6. The winner is the player with the most dog bones.

DOG PEN

Boning Up on Math Facts

DOG PEN

# Tic Tac Toe Sums

**Materials:** Tic Tac Toe Sums Game Board  
Game Markers in 2 Colors (checkers, two-sided bingo chips, colored cubes, etc.)  
Two Large Paperclips

**Object of the Game:** To be the first player to cover 3 squares in a row horizontally, diagonally, or vertically

## Directions:

1. Both players begin by tossing a game marker onto the game board. The person whose marker lands on the highest number chooses a color and becomes Player 1.
2. To play, Player 1 slides the 2 paperclips onto the bottom edge of the game board so that they point to 2 different numbers (1 - 9).
3. Add the two numbers and place a colored game marker onto their sum on the game board. (Note: Each sum appears twice on the board, but players may only mark one sum per play.)
4. Player 2 slides **one** paperclip to a different number leaving one paperclip in place. Cover the new sum with a different color marker.
5. Take turns moving one paperclip and covering the sum of the numbers.
6. The winner is the first player to cover 3 squares in a row horizontally, vertically, or diagonally.

# Tic Tac Toe

## Sums

1	2	3	4	5	6
7	8	9	10	11	12
13	14	15	16	17	18
18	17	16	15	14	13
12	11	10	9	8	7
6	5	4	3	2	1

1 2 3 4 5 6 7 8 9

# Addition Shake Up

**Materials:** 2 small objects such as dried beans or paper clips  
Egg carton randomly numbered 1 to 9 or 1 to 12  
Scoring Chart or paper for keeping score  
Calculator or Addition Chart  
Pencil

## Object of the Game:

To be the first person to earn 100 points

## Directions:

1. Decide who will be Player 1 and who will be Player 2. Make a T-chart for keeping score and write the two names at the top of the chart.
2. Player 1 begins by placing the 2 objects into the egg carton and closing the top. He or she shakes the carton gently and opens it up.
3. Player 1 calls out the numbers marked by the objects and mentally adds them to find the sum.
4. If Player 1 correctly names the sum, that number is recorded on the chart as his or her points for that round. (Use the calculator or Addition Chart to find the answer. If the sum is not correct, he or she records a 0 for points earned.)
5. Player 2 repeats steps 2 - 5 and records the points earned.
6. Continue taking turns shaking the carton and adding the numbers. After each round, use the calculator to find and record the total points (see example above). The winner is the first player to earn 100 or more total points.
7. The loser of the first game becomes Player 1 for the next game.

Player 1	Player 2

# More Teaching Resources from Laura Candler

## Daily Math Puzzler Program (Levels A - D)

I just implemented Laura's Math Puzzlers, and after two weeks I can already see changes in my class. They are picking up good habits like underlining key words, and writing complete answers already! Each day when we take out the sheet, they know what to do and enjoy doing it. I think part of the fun comes from the program's title "Math Puzzlers". Somehow, they seem to think puzzles are way more fun than math word problems. I also have to say that the breadth of topics and strategies covered in just one weekly sheet is impressive. It is a great way to keep math topics fresh, and have kids apply them to real situations. Each problem could be solved using different strategies, so it has been great for my kids to see all the different ways they could have approached the problem.

~ Dawn, Minnesota

## Math Stations for Middle Grades

I just downloaded your Math Stations for Middle Grades, and it is EXACTLY what I was looking for! This is my second year teaching math, after eleven years as a communications teacher. I don't feel I made math fun or interesting for my students last year, which means they didn't learn the things I wanted them to learn about setting goals for themselves and enjoying the challenge for its own sake. Now I finally know how to do that, and I will be able to not only use your activities but build from them and tailor them to my own students' specific needs. Your math stations provide exactly that element of fun practice and social sharing that I hoped to add this year. I can't wait to get started! ~ Shari Miller, Texas

## Classroom Goal Setting

WOW! Thank you so MUCH! I just downloaded your Goal Setting Power Pack and I LOVE it! I was most pleasantly surprised because I teach a combination class of grades 6-7-8, and wasn't sure if your pack would be "old" enough for my students! No need to worry....it's perfect! Thank you for a wonderful, quality product!

~ Nancy Berner, Pennsylvania

# Teaching Resources Website

[www.lauracandler.com](http://www.lauracandler.com)

## Ready-to-use Resources for Teachers!

- Free blackline masters and printables
- Lesson plans and teaching strategies
- Cooperative learning methods
- Classroom management and motivation
- Literacy and Literature Circle strategies
- Mathematics instructional resources
- Candler's Classroom Connections

Receive the **Classroom Economy** and **Problem Solving Assessment Power Pack** for FREE when you sign up for Laura Candler's bi-weekly newsletters at [www.lauracandler.com](http://www.lauracandler.com)!

## Workshop Information

- Invite Laura to your school or district to energize your teachers with powerful strategies!
- Workshops available:
  - \* The Dynamic Duo:
    - Putting the Punch in Math Instruction
  - \* Innovative Approaches to Literacy Instruction
- Teachers walk away with specific strategies to implement in their classrooms the next day.
