Computation Review and
Word Problems

Task Cards for Centers,
Cooperative Learning, and
Whole Class Review

Fractions of Whole Numbers Task Cards includes 28 unique fraction task cards, 2 types of recording forms, and answers. These cards can be used with a variety of active engagement learning games for partners or teams, in math centers, or even with a whole-class review. The set includes 12 computational problems at the beginning and 16 word problems at the end. If you only want to use half of them, simply have students complete the odd or even numbered ones. One set has a colored background to help differentiate between the levels, but I also created a black and white set for those who want to conserve ink.

Common Core Standards Supported:

- **4.NF.B.4.C** - Solve word problems involving multiplication of a fraction by a whole number, e.g., by using visual fraction models and equations to represent the problem.
- **4.MD.A.1** - Know relative sizes of measurement units within one system of units including km, m, cm; kg, g; lb, oz.; l, ml; hr, min, sec.
- **4.MD.A.2** - Use the four operations to solve word problems involving distances, intervals of time, liquid volumes, masses of objects, and money, including problems involving simple fractions or decimals, and problems that require expressing measurements given in a larger unit in terms of a smaller unit.

What's Included:

- Fraction Task Cards (28 color and 28 B&W)
- 28 Answer Cards
- One Page Answer Key
- 2 Types of Recording Forms
- Blank Task Cards
- Fraction Task Card Covers

Preparing the Cards

Print the task cards on sturdy cardstock or construction paper. If you want answers on the backs of the cards, print the answer card pages on the backs of the task card pages before laminating them. If aligned properly, the answer for each card will appear on the reverse side. Cut the cards apart and store each set in a plastic zippered bag. To help students identify the cards, cut out and laminate a cover card for each set. Then when students bag up the cards, ask them to put the cover on top.

Version 1

#6 $\frac{3}{4}$ of 28	#8 $\frac{2}{3}$ of 21	#10 $\frac{1}{2}$ of 18	#12 $\frac{3}{5}$ of 25
#5 $\frac{2}{3}$ of 15	#7 $\frac{3}{8}$ of 16	#9 $\frac{3}{8}$ of 24	#11 $\frac{4}{5}$ of 30

Version 2

#14 Mr. James drove 30 miles to the store. He stopped to get gas $\frac{2}{5}$ of the way there. How many miles did he drive before he stopped for gas?	#16 Chocolate truffles at the Sweet Tooth Factory cost \$8 per pound. If Xavier buys $\frac{3}{4}$ of a pound, how much will he spend?	#18 A drink recipe makes 32 oz of punch. If each person is served $\frac{1}{4}$ of the recipe, how many ounces per serving?	#20 Julie is 10, and her sister Sandra is $\frac{4}{5}$ of Julie's age. How old is Sandra?
#13 Sally collected 15 seashells, but $\frac{1}{3}$ of them were broken. How many shells were broken?	#15 Dave read a dozen books over the summer, and $\frac{2}{3}$ were fiction. How many fiction books did he read?	#17 An adult movie ticket is \$12 and a child's ticket is $\frac{3}{4}$ of that price. How much does a child's ticket cost?	#19 Rex's book is 100 pages, and he's $\frac{3}{4}$ of the way through it. How many pages does he have left to read?

#21

Sara's class has 24 students and $\frac{5}{8}$ of them are boys. How many girls are in Sara's class?

#22

Jim has 30 minutes to take a test. He looks at his watch during the test and notices that $\frac{1}{3}$ of the time has passed. How many minutes left?

#23

Sixteen children attended Robert's party. Three-fourths of them went swimming. How many children swam?

#24

Randal bought a board that measured one yard long. He cut $\frac{2}{3}$ of it to use for a shelf. How many inches long was his shelf?

9

#25

Mary's school bus can seat 50 students. If the bus is $\frac{4}{5}$ full, how many students are on the bus?

#26

One fourth of the month names start with the letter 'Y.' How many month names do not begin with "J"?

11

#27

Mrs. Granville baked two dozen cupcakes and frosted $\frac{7}{8}$ of them. How many cupcakes did she frost?

#28

A zebra's top speed is 40 miles per hour, and an elephant can run $\frac{5}{8}$ as fast. What's the elephant's top speed?
